

## Install Windows VMWare Horizon Client (Windows)

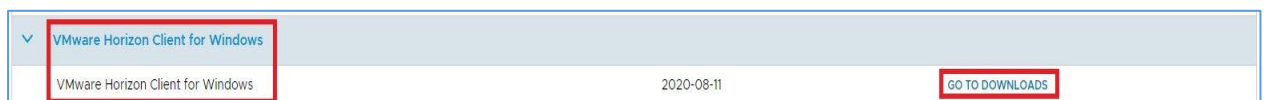

1) Browse to <https://uag.setu.ie>

2) Select Install VMware Horizon Client

3) On the next screen Accept Default Version and Click '**GO TO DOWNLOADS**' to start downloading the client

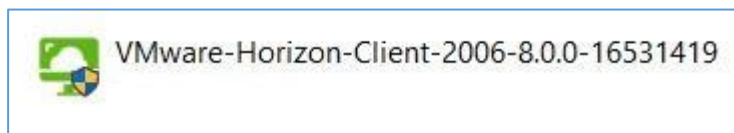

**For windows based laptops or PCs**

4) On next screen and click on

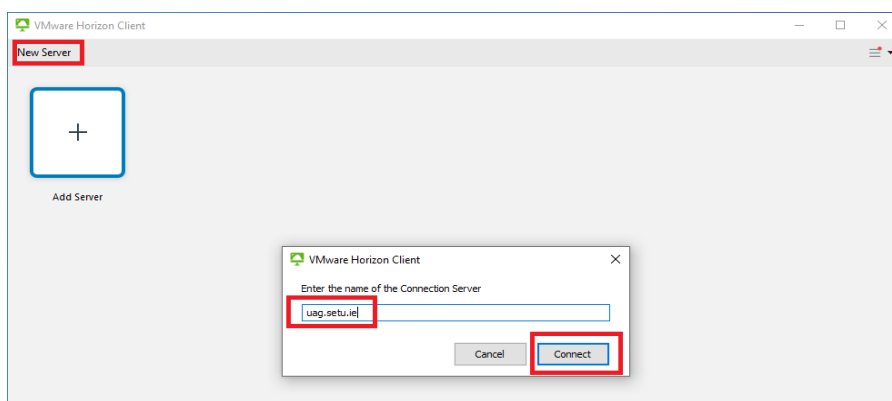

**DOWNLOAD NOW**

5) When the download completes right click on the installer and select Run as administrator. You may need to go to your Downloads folder to find the downloaded file.

6) Accept default settings. Previous versions of Horizon Client will be automatically upgraded. You will be prompted to restart the computer.

7) Launch Horizon client – authenticate if prompted.

8) Click on “New Server” and enter: **uag.setu.ie** and select connect.

9) Login with your student credentials e.g. **C001234567@setu.ie**, select no when prompted to add shortcuts and select your pool or application.
